## On-site-repair-services

We have technicians and specialists for drives. We would be glad to help you where problems occur in CNC machines

Ask us for a solution. Our technicians are well qualified and equipped with most modern measuring instruments. Because we are specialized in certain drives, motors and devices, we are able to provide best solutions for you. Our technicians will come to you with a replacement drive and take your defective drive. So you can go on working with minimal downtime.

Our technicians are going to demount/mount your drive and test/adjust them based on the specifications.
